FINLAND IS A CERTIFIED YOUTH EXCHANGE COUNTRY –

YOU WILL BE SAFE WITH US!

Year in Finland is often said to be an unforgettable experience. Here you can make friends and memories for a lifetime!

Finland is a land of extremes. We have 4 seasons. Our temperature can vary from -35°C to +35° C. During the winter we hardly have day light. During the summer Finland has maximum amount of sun light. So much that at one point we hardly have any night (more northern you go the longer the day). This helps our berries, herbs and veggies create more vitamins, minerals and flavor. No wonder that Finnish berries and veggies are said to be the healthiest and most nutritious on earth.

To start the year in Finland all inbound students are invited to our Orientation Camp. During one week the students get over their jet lag, make friends with each other and learn their first Finnish (or Swedish or Estonian) phrases. They also get acquainted with the Finnish nature, the Finnish people and – if you like – the Finnishsauna.

FINLAND & ESTONIA

Finland has 6 districts, Estonia is part of D1420.

Estonia is clean, safe and tech-savvy country. Estonia is one of the most technologically advanced countries in the world. In Estonia internet acces is considered a human right. Estonia is also one of Europe's most spacious countries. With a territory roughly matching that of the Netherlands, it is home to only 1.3 million people. In Estonia you are never more than a 30-min drive away from a forest or a lake. According to the WHO, Estonia has the best overall air quality in the entire world.

Despite of its size, you would still take a lifetime to enjoy all the galleries, theatres, concerts, festivals, markets, fairs and beaches this country has to offer.

FINLAND HAS UNIQUE NATURE

Finland is a country of 4 seasons, 180.000 lakes, vast forests and fairly small cities. It extends over a 1000 km from the beautiful archipelago and urban life of Helsinki on the south coast to the rugged fells and tundra in the very north of the country.

DESIGN & HIGH TECH

Finland is also known for its design and high tech skills. You may have heard of architecture Alvar Aalto, designers Tapio Wirkkala, Eero Aarnio, Timo Sarpasneva and brands like Marimekko. Luxury Cruise Ships sailing e.g. on the Caribbean sea also come from Finland. Polar fitness trackers and GPS sports watches are known around the world. Or maybe you have played Angry Birds or Habbo – they are also Finnish!

EDUCATION

Tuition is free and also includes a warm lunch at school. The hosting Rotary club pays necessary books and other materials for exchange students.
